

OGMP 2.0 Reporting and Support

OGMP 2.0 submissions require more than completing templates; operators must assemble a coherent, defensible package with consistent data, clear methods, and documentation that can withstand review and feedback cycles.

Highwood's OGMP 2.0 Reporting and Support service prepares a complete, submission-ready OGMP 2.0 package, including the annual Implementation Plan, required spreadsheet templates, supporting documentation, and feedback incorporation, so you can submit with confidence.

Benefits

By completing OGMP 2.0 Reporting and Support, you reduce submission risk and rework by delivering a coherent, defensible package aligned to Level 5 expectations and prepared for review cycles.

Use cases

- You are preparing an OGMP submission and need a defensible, submission-ready package
- You want to strengthen Level 5 alignment through improved documentation and consistency
- You need support incorporating feedback and tightening defensibility under OGMP expectations

Inputs

- MIIs and reconciliation outputs (often delivered through Highwood's MII services)
- Inventory methods, datasets, and internal context required for the annual Implementation Plan
- Prior submissions, reviewer feedback, and reporting templates (as applicable)
- Availability for working sessions to develop Implementation Plan content and future planning

Outputs

- Compiled and reviewed OGMP submission dataset and completed UNEP-required spreadsheet templates
- Annual Implementation Plan (Level 5 oriented)
- Supporting documentation and methodology narrative aligned to OGMP expectations
- Quality review for internal consistency and defensibility
- Support to address and incorporate UNEP feedback (as needed)
- Finalized submission-ready package for customer submission

Note: When used with EIP, this service benefits from centralized data management, traceable MII workflows, and streamlined preparation of audit-ready reporting packages.

Estimated timeline

6–12+ weeks, depending on the number of assets/sites, data readiness, and the feedback cycle timeline.

Next step

Speak to a Methane Advisor to align scope, timelines, and prerequisites for a Level 5-ready submission package.
